Features

Equipped with the Ultra Low Voltage Intel(R) Celeron(R) M Processor 1.0GHz (FSB400MHz) CPU and memory conforming 512MB as standard

Fan-less operation achieved by natural air-cooling

High reliability and completely silent running (when fitted with the silicon disk from CONTEC)

Long, reliable supply (The CPU and chip set are embedded versions.)

Adoption of BIOS (Award, Ltd.) customized by CONTEC to support the BIOS level

Equipped with the CF card slot (Type I, bootable), Audio (AC97 conforming), 100BASE-TX, Serial (RS-232C) x 4, I/F such as USB2.0 x 6 as a standard

Equipped with a secondary-IDE connector to allow an optional external CD-ROM/DVD-ROM drive to be connected

Capable of starting up, even with the battery dead, using CMOS data retained by EEPROM

Extension interfaces all located on the front face Slot-in system facilitating the mounting and demounting of storage devices

AC power cable with stopper clamp and CF card slot with retaining bracket

Installation-compatible with conventional products in the IPC-BX630/620/600 series

This product is an IBM PC/AT compatible, box computer designed for industrial use based on a low-power-consumption CPU of the Ultra Low Voltage Intel(R) Celeron(R) M Processor 1.0GHz (FSB400MHz), to operate as a completely nature-cooled (fanless) system. The box computer provides a variety of interfaces including the USB2.0, 100BASE-TX, and RS-232C ports, capable of serving for a wide range of applications as a compact platform based on a general-purpose PC OS. As this series incorporates handpicked components such as the embedded types of CPU and chipset, it excels in environmental resistance and remains in stable supply for an extended period of time. You can therefore use the box computer under severe operating conditions such as FA with ease.

*1 Please do not connect it excluding the CD-ROM/DVD-ROM drive.

*2 The total capacity for power supply to external devices at +5 V must fall within 4 A.

* The PCI bus slots are 32-bit type, not verified for operation of boards for both 32-bit and 64-bit bus slots.

Installation Environment Requirements

Parameter	Requirement description
Power supply specifications	Allowable instantaneous power outage Less than 20ms One minute each for AC2.0kV (input - FG) 20mA
	Dielectric strength 50M Ω (500VDC)
	Operating temperature 0 - 50°C (SDD in use *1), 5 - 45°C (HDD in use)
	Storage temperature -10 - 60°C
	Humidity 10 - 90%RH (No condensation)
	Floating dust particles Not to be excessive
	Corrosive gases None
Ambient specifications	Line noise AC line/±2kV, Signal line/±1kV (IEC61000-4-4 Level 3, EN61000-4-4 Level 3)
	Static electricity resistance Contact discharge/±4kV (IEC61000-4-2 Level 2, EN61000-4-2 Level 2) Atmospheric discharge/±8kV (IEC61000-4-2 Level 3, EN61000-4-2 Level 3)
	Vibration resistance *2 Sweep resistance 10 - 57Hz/semi-amplitude 0.15mm 57 - 150Hz/2.0G 40 min. each in x, y, and z directions (JIS C0040-compliant, IEC68-2-6-compliant)
	Impact resistance *2 10G, half-sine shock for 11 ms in x, y, and z directions (JIS C0041-compliant, IEC68-2-27-compliant)
	Grounding Class D grounding (previous class 3 grounding)

*1 When Windows OS operates.

*2 When the HDD is not in use.

*2 Please confirm latest information on the CONTEC homepage though the user's manual is stored in IPC-SLIB-01.

*3 It is not packed to the Windows XP Professional pre-install model.

*4 It is not packed to the Windows XP Embedded pre-install model.

*5 It is not packed to the OS uninstall model.

Component Life

(1) Power supply--- Estimated life is about 6 years based on continual operation at 40°C (horizontal installation). However, (higher) operating temperatures will result in shorter life.

(2) Battery--- The internal calendar clock and CMOS RAM are backed by a Lithium primary battery. The backup time at a temperature of 25°C with the power disconnected is 10 years or more.

* Replacement of expendables is handled as a repair (there will be a charge).

Expansion Slots (P2 and P4 model)

The P2 model is equipped with two PCI/ISA bus expansion slots capable of accepting either PCI or ISA bus boards. The P4 model is equipped with two PCI/ISA slots and two PCI slots capable of accepting only PCI bus boards as well.

Board Dimensions Allowed

CAUTION

A board that uses the back of the board edge connector (the shaded area in the figure) may not be mounted.

The ISA bus slot cannot use the following signals.

-5V, IOCHK, REFRESH, MASTER

The PCI bus slots are 32-bit type. They have not been verified for operation of 64/32-bit boards such as the ADAPTEC 39160SCSI board or Intel Pro1000/MT network board.

Installation Requirements

The BOX-PC can be installed in any orientation (1) - (3). Avoid orientation (4) - (6) since it might not adequately dissipate heat. In addition, take appropriate measures so that the ambient temperature falls within the range of installation environment conditions, such as keeping the system unit well-ventilated and sufficiently spaced its surroundings.
